# Presentation

- During the last 25 years in the Industrial Supply sector, our team has been specializing in providing technical solutions to the different needs of customers in our market.
- Throughout our professional career we have been choosing a range of products that allows us to offer a comprehensive, quality and personalized service for each of our collaborators who carry out applications in the fields of welding, logistics, maintenance and process automation.
- We base our dedication in the treatment and personalized service with the purpose of attending to any need in a particular way.

# Products

- Specialized in the conveying industry and factory automation market.

## Some of our dealers

### 1. OBARA

-  
Full range of  
welding equipment

### 2. PARKER

-  
The world's leading diversified  
manufacturer of motion and  
control technologies

### 3. TALLERES AR

-  
Vacuum  
handling systems

### 4. EISELE CONNECTORS

-  
High quality connection  
components of solid metal

### 5. TAKUMA CARRY

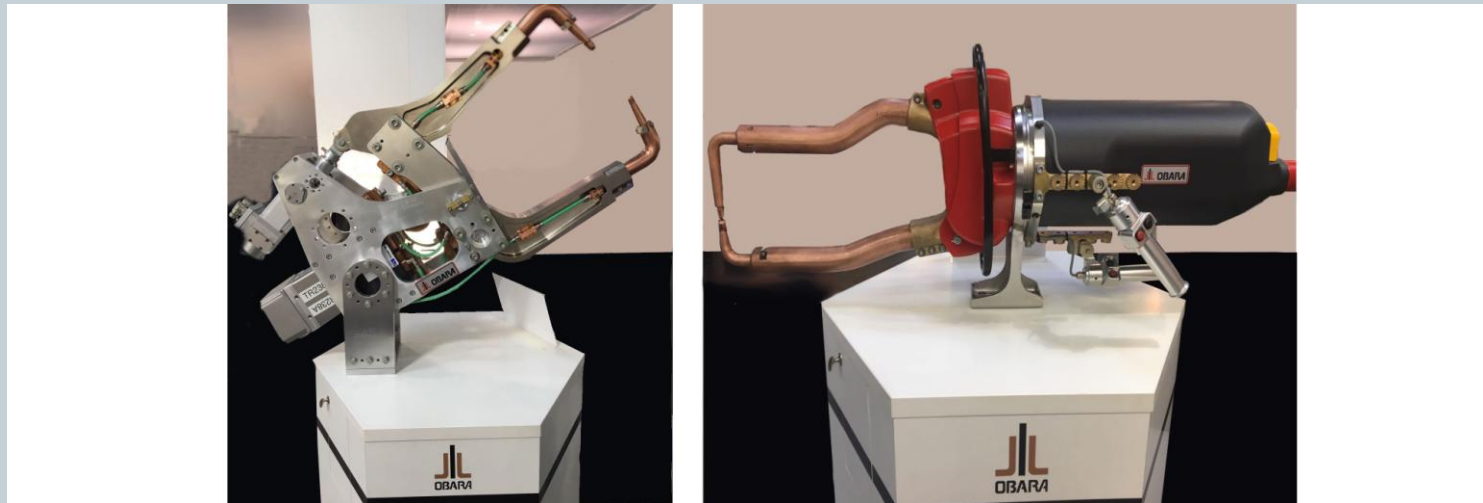

-  
AGV – Autoguided vehicles Takuma

# 1. TOTAL WELDING SYSTEMS AND ITS EQUIPMENT

- OBARA is the world's leading manufacturer of resistance welding equipment. The company evolved around the automotive industry and its resistance welding needs since its inception in 1958.

Today, Obara's equipment is used in automotive production lines around the world.

## 2. PARKER STORE

- Representing Parker Hannifin and having Parker Store facilities, Aresfluid serves our customers both in terms of material supply and technical support.

Industrial  
hoses

Hydraulics

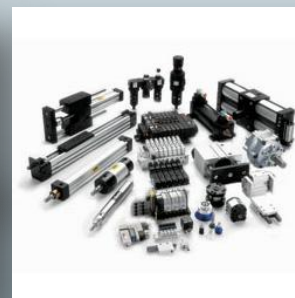

Parker Legris

Flexible  
hoses PTS

Pneumatics

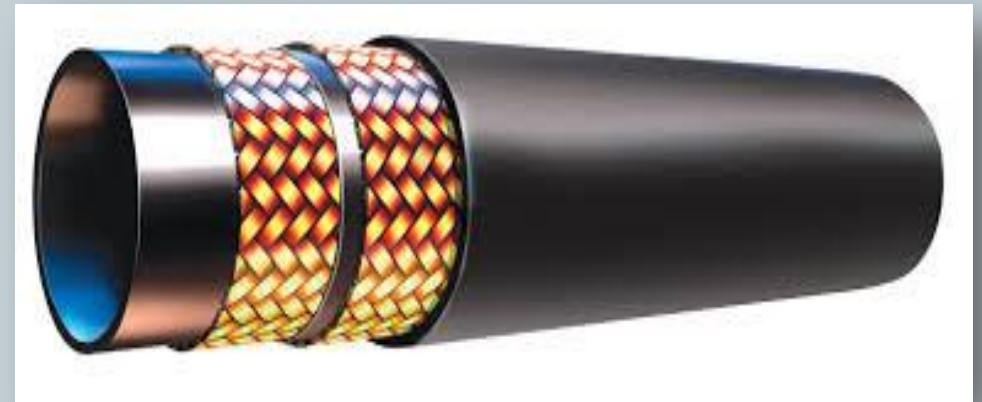

Parker Origa

Filtration

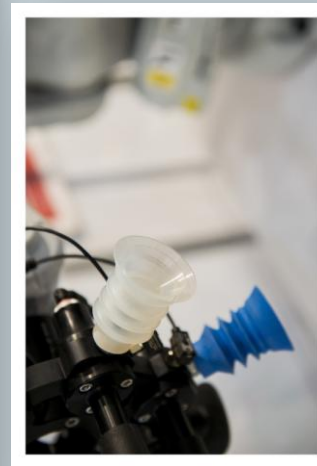

Aresfluid Técnicas specializes in hoses and fittings. Together with the firm Bamar, we have presence of Parker Hannifin material in the largest machinery manufacturers of our market. The users of these products, our clients, are the best guarantee in our growth project and satisfactory result of our effort.

### 3. VACUUM SYSTEMS AR

- Vacuum handling systems AR
- Supply of auxiliary material and manufacture of customized solutions as manipulation grips for robot.

VACUUM TECHNOLOGY

## 4. HIGH QUALITY CONNECTION COMPONENTS OF SOLID METAL

- Eisele BASICLINE -Pneumatic connectors for compressed air, vacuum, gases and fluids.
- Eisele INOXLINe -Push-in fittings are manufactured of acid-resistant, corrosion-free stainless steel of highest material quality.
- Eisele MULTILINE -multiple connectors allow to combine such different connections as vacuum, cooling water, fluids, pneumatics and gases – plus electronic and electric cables – in a single connector.
- Eisele LIQUIDLINE -The most comprehensive line of push-in fittings and threaded connections for cooling water circuits.
